Facebook Security

Facebook Security

- LOGIN INTO YOUR FACEBOOK ACCOUNT

The image shows a screenshot of the Facebook website's login and sign-up section. At the top left is the Facebook logo. To its right are input fields for 'Email or Phone' and 'Password', followed by a 'Log In' button. Below the password field are links for 'Keep me logged in' and 'Forgot your password?'. The main content area is split: on the left, a message 'Facebook helps you connect and share with the people in your life.' is accompanied by a world map with user avatars and connecting lines; on the right, the 'Sign Up' section is titled 'Sign Up' with the tagline 'It's free and always will be.' Below this are four input fields: 'First Name', 'Last Name', 'Your Email', and 'Re-enter Email', followed by a 'New Password' field.

Notifications Settings

How You Get Notifications	On Facebook	All notifications	View
Email	Only important notifications	Edit	
Push notifications	Some notifications	View	
Text message	Text notifications are turned off	Edit	

What You Get Notified About	Activity that involves you	On	View
Close Friends activity	On Facebook	Edit	
Tags	Friends of Friends	Edit	
Pages you manage	On for 2 of your 2 Pages	Edit	
Group activity	On for 58 of your 66 groups	Edit	
App requests and activity	On for 39 of your 40 apps	Edit	

-With login notifications set as shown above, you'll get notified with a text message (if your phone number is verified) and email each time someone uses a device different from yours to log in to your account.

The screenshot displays the Facebook Security Settings interface. On the left, a navigation menu includes General, Security (selected), Privacy, Timeline and Tagging, Blocking, Notifications, Mobile, and Subscribers. Below this, there are links for Apps, Ads, Payments, Gifts, and Support Dashboard. The main content area is titled 'Security Settings' and lists several categories: Secure Browsing (enabled), Login Notifications (with checkboxes for Email and Text message/Push notification, both checked), App Passwords (none created), Recognized Devices (91 devices), and Active Sessions (logged in from Mumbai, MH, IN and 1 other location). At the bottom, there is a link to 'Deactivate your account'.

It's the best way to monitor your facebook account and it quite a great feature from facebook. Whenever you log in from a strange device, you're prompted to save the device so it can be recognized next time you log in. If you're using a cyber cafe or a friend's computer, you shouldn't save the device.

Name New Device

Please give this device a name. Because you have Login Notifications enabled, you will receive a notification that you logged in from this machine.
